Mines and Mining Stocks

READY TO BUILD

Contractor Says Camp Can Celebrate "Railroad Day" on July Fourth.

WORK TO BEGIN NEXT WEEK

MINES, IN MEANTIME, ARE MAK-ING THE FUR FLY.

Advices from Pioche yesterday were to the effect that Deal Brothers & Mendenhall, who have the contract for building the Pioche & Caliente railroad, will move their construction outfit on to the ground and begin work during the coming week. Mr. Mendenhall is now at Caliente and he promises that the line will be completed in time to celebrate its completion on the Fourth of July.

Much of the twenty-eight miles of grade was long since constructed and, had it not been for the great trouble that has surrounded the operation of the San Pedro, Los Angeles & Salt Lake road through the Meadow Valley wash below Caliente during the past three months, construction of the line to Pioche would have been well under way now. As it is, most of the material, including ties and rails, is now assembled at Caliente, the starting point, awaiting the construc-tion gang and apparatus to string it

tion gang and apparatus to string it out.

In the meantime Pioche is coming rapidly to the front. The Nevada-Utah company is stated to be in readiness to supply a tremendous tonnage of low and modest grade ore to smelters here as soon as railroad transportation is secured. The Bristol Copper company is also blocking out and piling up ore to beat the band, while W. A. Clark, jr., son of William A. Clark of Montana, has taken a chance at the camp by entering into negotiations and securing contracts that will eventually place him and his associates in control of the E. & F. company's mines in the same vicinity at the Bristol company. The management of the E. & F. has already been turned over to J. A. Ryan, and A. C. Stevens, another member of the Clark mining staff, has been made superintendent of the mines. Machinery is to be placed at once and the ground, which is a fine producer now, is to be most extensively and systematically opened.

A dozen other well known and rich mining properties in the Ploche country are now receiving attention and the once famous old town is filling up rapidly.

FAIRVIEW CAMP IS MAKING BIG SHOWING

Reports reach here from Fairview that the Nevada Hills property, that 50,000 secks of ore, going \$100 to the sack, have been brought to the surface within the pest thirty days. On the Eagle property, which adjoins and is controlled by United States Senator Nixon and George Wingfield of Goldfield, a vein seventy feet wide has been opened up at the 200-foot level that shows the presence of enough ore to warrant the erection of a mill of 500 tons capacity per day. On the Eagle's Nest, which adjoins the Eagle, and which is controlled by Sullivan and Rice, and on the Hailstone, which adjoins the Reports reach here from Fairview that Hailstone, which adjoins the Eagle's Nest, controlled by the same par-ties, the mother lode of the Fairview district has been opened up and shows a vein thirty feet wide, the ore averaging \$22 per ton with numerous cross veins and

Johnnie Harnan, the hero of the great Portland mine of Cripple Creek, is again in evidence. He got into Fairview early and picked up the Cyclone group of 129 acres. He has opened up a vein of high-grade silver ore, assays from which are ciaimed to show values that go "into the victures."

Within a thousand feet of the Nevada Within a thousand feet of the Nevada Hills on the south a big quartz ledge is reported to traverse the Cedar group of claims for a distance of over 3,000 feet, and the average assays obtained from croppings along the strike of the ledge is said to be high enough to warrant the belief that the Cedars will, under development becomes a greater within around the contract the contract that the cedars will, under development becomes a greater withing around the contract the contract that the cedars will be contracted to the contract the c belief that the Cedars will, under development, become a greater mining property than the Nevada Hills. Through the Cedars this great mother lode is known to pass into the Red Rock, Vermont and Keliance claims. Shallow shafts in the Vermonts and Reliances give phenomenal assays, the lowest of which is reported to be \$60 per ton.

CEDAR ORE IS WORTH \$3,000 FOR THE CAR

Control assays on the thirty-nine tons of ore from the Cedar company's property, indicate that the lot will net the com-

lead, gold and copper ores, \$29,000; bullion, \$46,000.

ing Signs of Improvement.

While the amount of trading done yesterday was light for Monday, the market was generally stronger, New York and May Day being the only stocks to register a loss. Carisa, Lower Mammoth, Columbus Consolidated, South Columbus, Star Consolidated, Uncle Sam and a number of other stocks were selling at better than Saturday's prices, while Daly-Judge and others held their own without effort.

buring the two regular and open board calls a total of 43,600 shares of stock, with a selling value of \$27.503.50, changed hands. Following is the list of final quotations and record of sales made during

EIGHTY-FOOT LEDGE IN NEVADA WONDER

ty, indicate that the lot will net the company better than \$7! per ton, or approximately \$3,000 for the car. The smelter assays and company returns were too wide apart and the lot was being umplied during the afternoon. But enough was known by the management to make it certain that the lot would net as much as the sum stated after railroad transportation, sampling, assaying and smelting charges were deducted.

Advices from Milford during the day were to the effect that the new steam hoisting machinery was being hauled to the mine from that station and, the weather holding good, it will be only a few weeks until the plant is installed and placed in commission.

Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Ca., amounted to \$75,000, as follows: Silver, lead, gold and copper ores, \$29,000; base bullion, \$46,000. of the ore in sight which Fairview already boasts of, the mineral area is believed to be considerably larger than that of Fairview, and the number of prospects that give earmarks of making great mines in the Wonder district is said to exceed that of Fairview.

The

Sanitary Condition

of the neighborhood demands the co-operation of the community. Clear up your yards and keep them clean. We can furnish the necessary tools. Rakes, hoes and forks. A good garbage can will help, also a length of hose.

King Hardware & Stove Co.

MINING STOCK EXCHANGE. BOSTON CON. AND

Treasurer Shirmer of Former Comes Out From the East to Inspect Properties.

STATELINE MINE TO RESUME

OPHIR WILL BEGIN WITH TWEN-TY MEN ON MAY 1.

Frank A. Shirmer, treasurer of the Bos ton Consolidated, is out from Boston for the purpose of making an inspection of the company's mines at Bingham and the big new milling plant at Garfield, west of this city. His inspection at these points of this city. His inspection at these points concluded, he will go down to Newhouse and size up conditions at the Cactus.

Mr. Shirmer manages to get out this way at least twice a year, and, while weather conditions have been greatly against making records. at mining properties for the greater portion of the time since the year opened, it is safe to say that the visitor will find much to interest him and also find that much to interest him and also find that wonderful progress has been made in both the Boston Consolidated and Newhouse mines since last he was out there.

He will find that the Boston Consolidated and Newhouse mines since last he was out there.

dated is in shape to make the record of its existence this year in the matter of production of shipping ore and that the great mountain of copper-bearing porphyry is rounding into shape for the production of any tonnage that may be demanded when the mili at Garfield is

placed in commission.

At the Cactus bonanza of the Newhouse Mines company, Mr. Shirmer will learn that, while apparently "wild and woolly" stories have been told concerning the magnitude and worth of the ore bodies disclosed since last summer, that nothing has been exaggerated; that the property is really in character was more more than the control of the control erty is really in shape to earn more mon-ey for the remainder of this year than any other mine in the state, not barring the Boston Consolidated, Utah Consoli-dated or Utah Copper—not that the mines mentioned have not the "goods," but be-cause the Cactus has its plant and equip-ment ready to do the business, while the others, with the exception of the Utah Consolidated, are simply "getting ready."

OPHIR MINE TO RESUME OPERATIONS MAY FIRST

C. E. Peak, the well-known mining man and claim owner of the Stateline district, was in the city yesterday loking after business on this end of the line. He reports that orders have just been received from the New Haven owners of the Ophir from the New Haven owners of the Ophir property, mines and mill, in that camp, to get everything in readiness for the campaign that is to be inaugurated on the first day of May. The man in charge of the property is now employing a small force in "spring cleaning" about the works and between now and the end of the month whoever is to be placed in charge of the properties will be out to marshal his crew of twenty or more men which will start the ball rolling.

The lively manner in which things are being done in the Gold Springs district, in the same vicinity, is having a stimulating effect on the Stateline district, and Mr. Peak believes that it will get off on the right foot this time and forge right to the front.

'I am staying with Stateline," said Mr. Peak, "because I know it is one of richest gold and silver regions in this country and because, when the time comes, it is going to outshine three-fourths of the gold camps of Nevada. It is only sixteen miles from Modena. On the San Pedro railroad, and the history the San Pedro railroad, and the history of the Johnnie, the Ophir, the Homestake and other splendid but much abused propositions down there, is such that no one doubts the value of the mines themselves. A dozen or more other fine propositions are coming to the front right now, and I predict that the stream of gold and silver bullion, to say nothing of the high-grade shipping ore that comes from Gold Springs, Stateline and the other districts nestled closely together there, will be making a noise in the mining world before a great while."

RAMSEY-COMSTOCK IS ROLLING OUT THE ORE

COPPER STOCKS IN BOSTON AND NEW YORK

and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, a feature that has just been added by James A. Polloek & Co. to 'ts private wire service, and from which it is secured for use in this department of The Herald:

Boston April 6 Herald:

Boston, April 8.—This was rather a gloomy day both inside and outside of the exchange. Coppers came out freely and showed a sagging tendency. One house was a steady seller of North Butte all day, getting rid of about 1.500 shares. Copper Range was sold by the traders and ran off easily two points. We think the short interest is getting larger and we would rather buy stocks than sell them at this level.

Mining Notes.

Colonel Nicholas Treweek is expected back from his extended eastern trip to-day.

Will be a wonderful producer.

A shaft has been put down to a depth of ninety feet and from the six-

Manager George H. Dern of the Con-solidated Mercur company was in the city yesterday signing ap pay checks for the discharge of the March payrolls at the mine and mill.

Fred C. Richmond, the Salt Lake Hardware company's mechanical engineer, re-turned from a trip to San Francisco Saturday night. He started out for Mex-ico, but found the people and trans-acted the business he started out for at San Francisco, so it was not necessary to go farther.

Frank Harris, president of the Beaver Carbonate Mining company, assisted by other local mining men interested in Beaver county enterprises, is arranging for a mining excursion to Milford, Frisco and Newhouse next Saturday. It is expected that three sleepers will be required to carry the crowd that is taking such a lively interest in mining down there these days.

Walter Fitch, who has accepted the general superintendency of all the properties controlled by the Calumet & Heela company, mention of which was made several days ago, left Chicago for his field of operations Saturday night. This places the direct handling of the biggest copper properties in the world with Mr. Fitch. Mr. Fitch made a host of friends in the west and every one of them will be glad to hear of his having gone to

top of the ladder as a mines man-

ager.

John Westerdahl, mine foreman of the properties of the Ely Consolidated company, who came down from Bellevue, Ida., with his family Sunday hight, left for camp again yesterday afternoon. He decided that there was no fun in working at Ely with his family hundreds of miles away, so he went after them.

The big meeting of the Silver King company, at which the proposed amalgamation of Park City properties will be considered. Is scheduled for tomorrow. The shareholders of the Kearns-Keith company met in special session yesterday and authorized the directors to use their own judgment concerning the basis on which the properties of the company should go into the merger.

J. M. Reynolds, Ernest Drake, general

should go into the merger.

J. M. Reynolds, Ernest Drake, general passenger agent of the Rock Island, and E. F. Brown, of Helper, were inspecting the Hecla company's property in Beaver county Sunday. Messrs. Drake and Brown were altogether surprised at what was shown them in the way of fine ore development. The company is now squaring away for the erection of buildings and making other arrangements for the big campaign that will be shortly inaugurated.

M. S. Hanauer, J. V. Sadler. 152 So. West Temple. P. O. box 1446. GOOD REPORT FROM THE SEVEN TROUGHE WONDER.

Mr. W. F. Gray of Goldfield has just arrived from the famous Seven Troughs district which is attracting so much attention of prominent mining

men.
During Mr. Gray's stay in Seven
Troughs he visited all of the most
promising properties. The Seven
Troughs Wonder, Mr. Gray considers
one of the greatest properties ever
discovered in this district, and says that within a short time this property

President John J. Daly of the Daly-Judge company is expected home to-night.

ty-five-foot level a drift is being run on the vein for a distance of forty-five feet with high-grade ore showing all Lafayette Holtrook, Charles Knudsen and J. M. Jenson left for the Seven Troughs district, Nevada, yesterday, to be gone a week or ten days.

A letter from Lima, Peru, under date of March 5 tells of the arrival of R. H. Channing and his leaving for the properties of the Cerro de Pasco company.

EXCURSIONS TO MILNER, IDA April 17 to 21.

Via Oregon Short Line, for opening h. five 30,000 acres of Carey land under Twin mines Falls North Side canal, and sale of Thirty carloads of ore from Utah, five from Nevada and one from Idaho mines were released from the Taylor & Brunton sampler yesterday morning. David H. Taylor, who has been away from the offices for a week or more in Colorado, returned Saturday night.

30,000 acres of Carey land under Twin Falls North Side canal, and sale of lots in new Milner townsite. Round trip from Salt Lake, \$10.55. Proportionately low rates from other points. Ticket Office, 201 Main street.

Sixty Years' Experience of an Old Nurse.

Mrs. Winslow's Soothing Syrup is the prescription of one of the best female physicians and nurses in the United States, and has been used for sixty years with never-failing success by millions of mothers for their children. During the process of teething its value is incalculable. It relieves the child from pain, cures diarrhoea, griping in the bowels and wind colic. By giving health to the child it rests the mother. Price, 75 cents a bottle.
